

Light System DALI

ERCO's lighting control system Light System DALI applies the DALI technology with individually addressable luminaires for efficient visual comfort and scenographic light. The consistent integration of software and hardware sets standards in ease of operation: convenient setup of complex light scenes via the ERCO Light Studio software, storage of extensive system and scene data in the Light Server 64+, and intuitive day-to-day operation via the wall-mounted ERCO Light Changer+. The Ethernet interfaces and digital/switch inputs allow easy connection of Light System DALI to media control systems, push-buttons and sensors.

Software

The Light Studio software is used to set up lighting installations with Light System DALI. It consists of five modules: Light Master, Light Book, Light Timer, Light Sequencer and Light Keeper. The software is suitable for the following operating systems: Windows XP, Vista and 7.

Output devices

The DALI controller stores the data for the luminaires, light scenes, timer programs and the room management. Interfaces can be used for connection of push-buttons, switches, sensors and media technology or to link a PC with the Light Studio software.

Input devices

The input devices are used for recalling light scenes and timer programs.

Accessories

Accessories are available to add sensors to the Light System DALI, integrate luminaires without DALI control gear or provide additional digital/switch inputs.
