

Gecko – Powerful light from a virtually invisible source

Glare-free accent lighting, flood-lighting and wallwashing in the outdoor area

Gecko emanates refined power despite its compact form. This is achieved by combining a slightly conical shape with quality design details such as seamless transitions. With its fluid, round outlines, this outdoor lighting tool enhances gardens and parks as an adaptable design feature which integrates flexibly in any surroundings. The small housing conceals sophisticated photometric properties: Optionally producing a uniform wide beam or sharp-edged accent light, Gecko creates impressive

façade and other outdoor lighting effects that require just a few of these luminaires. Excellent glare control ensures accent lighting, floodlighting and wallwashing from a virtually invisible light source. With a luminaire head that can be tilted and rotated in any direction, Gecko is quick and easy to adjust precisely to the required position, as its maintenance-free LED optoelectronics help to reduce the operating costs.

ERCO

Technical Region: 220-240V 50/60Hz
We reserve the right to make technical
and design changes.
Edition: 04.11.2020

Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

1 ERCO Spherolit lens

- Light distributions: narrow spot, spot, flood, wide flood, extra wide flood, oval flood or wallwash
- Oval flood 360° rotation

2 ERCO LED-module

- High-power LED: warm white (3000K) or neutral white (4000K)
- Collimating lens made of optical polymer

3 Light head

- Corrosion-resistant cast aluminium, No-Rinse surface treatment
- Graphit m, double powder-coated
- Non-reflective safety glass

4 Housing and hinge

- Corrosion-resistant cast aluminium, No-Rinse surface treatment
- Graphit m, double powder-coated
- Optimised surface for reduced accumulation of dirt
- 130° tilt, 360° rotation
- Hinge with sealing and inner cable routing

5 Mounting plate

- Corrosion-resistant cast aluminium, No-Rinse surface treatment
- Graphit m, double powder-coated
- Optimised surface for reduced accumulation of dirt

6 Control gear

- Switchable or DALI dimmable

Protection mode IP65

Dust-tight and water jet-proof

Variants on request

- High-power LEDs: 3000K CRI 97 or 2700K, 3500K, 4000K with CRI 92
 - Housing: 10,000 further colours
- Please contact your ERCO consultant.

Design and application:
www.erco.com/gecko

Gecko Projectors, floodlights, wallwashers

Oval flood freely rotatable
The round oval flood Spherolit lens can be freely rotated with all luminaires to optimally align the light to various objects.

Improved visual comfort
ERCO has developed luminaires with special housing designs and high quality optical components specifically for demanding visual tasks to provide enhanced visual comfort.

Small luminaire dimensions
Small luminaires are discreet and place the focus on the light itself. Small luminaire dimensions are particularly advantageous in compact room situations.

Special characteristics

-  Improved visual comfort
-  Oval flood, freely rotatable
-  Small luminaire dimensions

-  ERCO high-power LEDs
-  Efficient Spherolit technology
-  Different light distributions
-  Different light colours

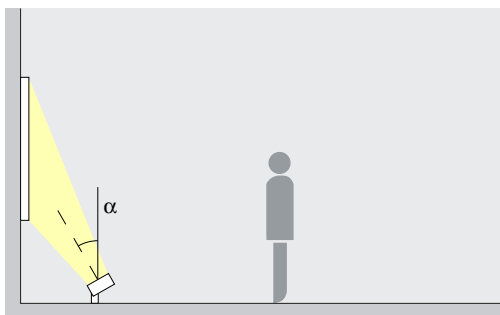

-  Excellent thermal management
-  EMC-optimised
-  Degree scale for good adjustability
-  Pivotable through 130°
-  Protection mode IP65

-  Switchable
-  DALI dimmable

Gecko Projectors, floodlights, wallwashers – Luminaire arrangement

Projectors

Narrow spot, Spot, Flood

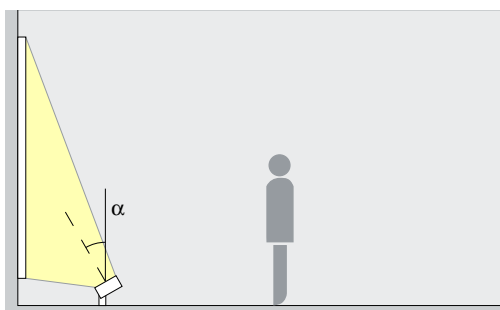

Accentuation

The ideal angle of tilt (α) for accent lighting with Gecko projectors is around 30° . This emphasises the three-dimensionality of architectural details, sculptures or trees, without distorting the spatial impression with excessive shadowing.

Arrangement: $\alpha = 30^\circ$

Floodlights

Wide flood, Extra wide flood, Oval flood

Washlighting

Gecko projectors ensure uniform floodlighting of long wall surfaces, columns or trees. The ideal angle of tilt (α) for this is around 30°

Arrangement: $\alpha = 30^\circ$

Lens wallwashers

Wallwash

Wallwashing

Uniform vertical illuminance in the outdoor area defines spatial borders. Here, the distance (a) of Gecko lens wallwashers from the wall should be around one third of the room height (h). This results in an angle of tilt (γ) of approx. 55° .

Arrangement: $a = 1/3 \times h$ or $\gamma = 55^\circ$

For good longitudinal uniformity, the spacing (d) of Gecko lens wallwashers may be up to 1.2 times the offset from the wall (a).

Arrangement: $d \leq 1.2 \times a$

The optimal wall offset and luminaire spacing for each product are indicated in the wallwasher tables in the catalogue and the product data sheets.
