

ERCO track and singlets – Supporting role

ERCO track deliver the energy required to light up rooms

ERCO track is more than a power source. The system provides a flexible infrastructure for luminaires, that can move with your changing requirements. Track are the anchor for your lighting concept and are primarily designed for mounting on ceilings or walls, whereas the flanged track is designed for suspended ceilings. Individual track lengths can be connected with each other so as to form rectangular and other shapes.

Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

1 Aluminum profile

- White (RAL9002), black or silver
- Powder-coated or anodized
- Track mounting surface with easy to remove knockouts at 15 3/4" (0.4m) intervals
- Flanged track: flanges for ceiling panels

2 Contacts

- 4 isolated copper conductors
- 2 separately switchable circuits of 20A each

3 Earth conductor

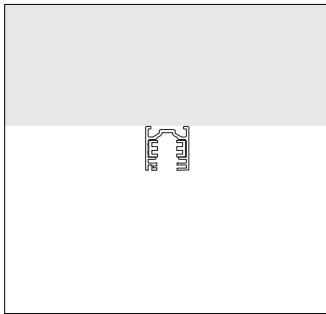

Variants on request

- Housing: 10,000 further colors
- Please contact your ERCO consultant.

ERCO track and singlets

Surface-mounted
Track can be easily mounted to ceilings and walls as a surface-mounted variant.

Recessed
A plaster trim profile is available as an accessory for flush mounting in the ceiling or wall.

Suspensions
Track can be simply suspended from the ceiling. Wire suspensions are ideal for sloping ceilings and pendant tubes are suitable for high loads.

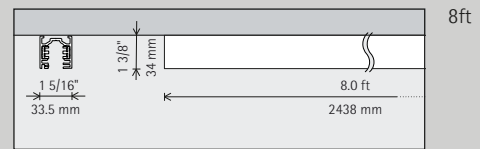

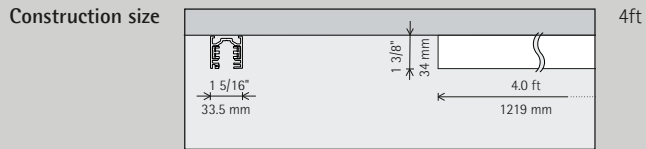

Gap-free mounting using connection components
The track and light structures can be connected to form straight lines with gap-free couplings or assembled to make right-angled structures with connecting parts.

Special characteristics	
	Recessed
	Surface-mounted
	Suspensions
	Continuous line arrangements are possible

- Various housing colors
- Various construction sizes
- Easy installation
- Accessory for mounting variants

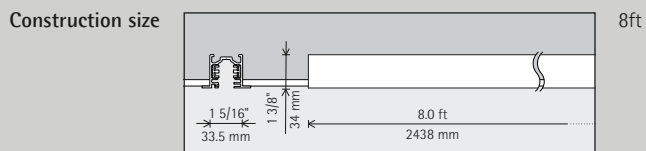

ERCO 2-circuit track
