

# Quintessence round – The system solution for excellent visual comfort

# Large luminaire spacing, high uniformity and excellent visual comfort

Quintessence sets standards in terms of visual comfort, efficiency and quality of light for recessed luminaires. The product range consists of downlights, lens wall-washers and directional spotlights. Characteristics of Quintessence downlights and lens wallwashers are their good glare control and high uniformity of illumination. The 90° beam angle and a 40° cutoff allow wide luminaire spacing for efficient general lighting.

Structure and characteristics
The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website

# 1 ERCO darklight reflector

- Downlight: cut-off angle 40° Polymer, aluminium vaporised, mirror-finish

# Wallwasher reflector

- Cut-off angle 80°
- Polymer, aluminium vaporised, mirror-finish

- 2 ERCO LED-module
  High-power LEDs: warm white (2700K or 3000K) or neutral white (3500K or 4000K)
- Directional luminaire with collimating lens made of optical polymer

# 3 Diffuser or lens

- Made of optical polymer
  Diffuser lens, wide flood, extra wide
  flood or lens system, wallwash
  Directional luminaire with Spherolit
- lens narrow spot, spot or flood

- 4 Mounting ring

   Covered mounting detail

   Fixing for ceiling thicknesses of
  1-25mm (size 3-4) or 1-30mm (size
  5-7)
- Polymer, white
- For flush mounting: mounting ring to be ordered separately, fixing for ceiling thicknesses of 12.5–25mm

- Cast aluminium, designed as heat sink
- Rotatable through 360°
- Fixing of the beam direction
  Directional luminaire: 0°-30° tilt.
  Lockable angles of tilt and rotation

- 6 Control gear
   Switchable, phase dimmable, DALI dimmable or Casambi Bluetooth
- Phase dimmable version: Dimming with external dimmers possible (trailing edge)

## Variants on request

- Reflector: coated matt gold, matt
- Connection: Caded mart gold, mart silver or matt champagne Connection: 3- or 5-pole plug with connection cable (Wago or Wieland) Mounting ring: 10,000 further

Very high visual comfort
The darklight reflector combines
maximum visual comfort with an
optimum light output ratio.

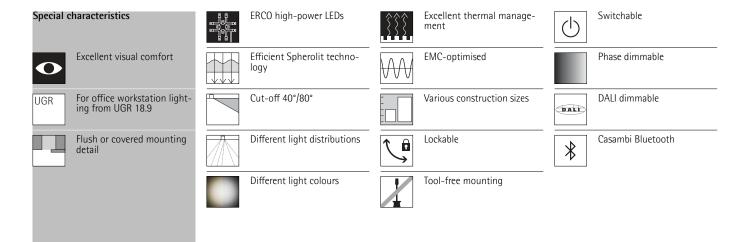

Suitable for office workstations ERCO develops luminaires with the specifications of good glare control and high visual comfort. UGR values are used as support for purely norm-referenced lighting. With downlights though this should not be carried out using 'blanket' values, but should be implemented according to the individual arrangement of luminaires in the room.

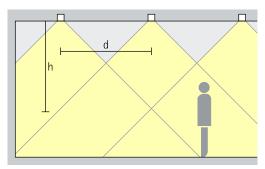

Covered or flush mounting detail As standard, all recessed luminaires have overlapping installation details. Flush mounting rings are available as accessories.

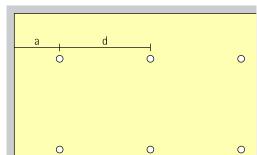

# Quintessence round Recessed luminaires – Luminaire arrangement

**Downlights** Wide flood, Extra wide flood

General lighting For uniform ambient lighting with high visual comfort, the spacing (d) between two Quintessence downlights may be up to approximately 1.5 times the height (h) of the luminaire above the working plane.

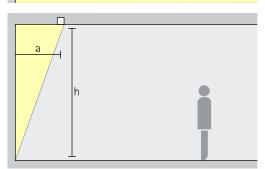

Arrangement:  $d \le 1.5 \times h$ 

The wall offset should be half the luminaire spacing.

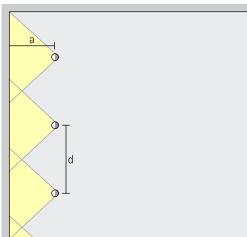

Arrangement: a = d / 2

Wallwashing For uniform vertical illuminance, the distance (a) of Quintessence lens wallwashers from the wall should be around one third of the room height (h).

Arrangement:  $a = 1/3 \times h$ 

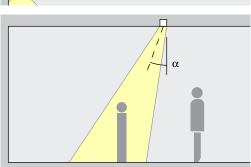

For good longitudinal uniformity, the spacing (d) of Quintessence lens wallwashers may be up to 1.3 times the offset from the wall

Arrangement:  $d \le 1.3 \times a$ 

The optimal wall offset and luminaire spacing for each product are indicated in the wallwasher tables in the catalogue and the product data sheets.

Accentuation

Quintessence directional luminaires accentuate artwork, products and architectural details effectively. The ideal angle of tilt  $(\alpha)$  for this is around 30°. The object is modelled without distorting the effect as a result of excessive shadowing. It also prevents shadows cast by the observer.

Arrangement:  $\alpha = 30^{\circ}$
