

## ERCO Hi-trac track with uplights – Carrying it off

**Hi-trac combines the flexible options of a track with the visual comfort of indirect lighting**

The Hi-trac light structure is a heavy-duty system and allows very wide spacing between the suspensions. Hi-trac is an aluminum extrusion and available with integrated ERCO track in two versions: either with an empty upper compartment for cables or as an indirect luminaire.

Hi-trac enables the combination of indirect lighting with accent light from the track.

### Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

#### 1 Panel profile

- White (RAL9002)
- Aluminum, powder-coated
- Track and panel profile to be assembled on site

#### 2 Contact (lower part)

- 4 isolated copper conductors
- 2 separately switchable circuits of 20A each

#### 3 Earth conductor

#### 4 Fixture with LED module (on upper side)

- High-power LEDs: warm white (2700K or 3000K) or neutral white (3500K or 4000K)
- Cover: diffuser, polymer, textured
- Covered control gear: trailing edge dimmable

or

#### Empty profile (upper side of track)

- For accommodating through-wiring or cover profiles

#### Variants on request

- Housing: 10,000 further colors
- Please contact your ERCO consultant.

## Investment security through flexibility

Thanks to durable, robust components that have been tried and tested over decades, Hi-trac track provides a high level of investment security, even for future luminaire generations. This flexible infrastructure enables the implementation of lighting concepts with spotlights, downlights and wallwashers.

## Wide spacing

The heavy-duty Hi-trac profiles allow wide spacing between the suspension points for wire or pendant suspensions.

## Extensive accessories

Whether straight lines, L-shapes or rectangular configurations: use our extensive range of accessories to adapt the track layout to your project.

## One track for different types of control

ERCO uses a track profile for 2-circuit operation with two separately switchable circuits. You can also integrate wireless control types such as Casambi Bluetooth.

## ERCO Hi-trac track with uplights – Luminaire arrangement

Luminaires, indirect  
Indirect emission

The LED module, mounted flush into the Hi-trac track from above, projects the light onto the ceiling, emphasizing the dimensions of high rooms. The ideal distance (a) of the light structure to the ceiling is 3ft.

Arrangement:  $a = 3\text{ft}$
