

Light+Building

Light is the fourth dimension of architecture. And every form of architecture is unique. Based on this philosophy, ERCO is designing a completely new and significantly larger fair stand at this year's Light+Building. Specific lighting solutions for a variety of applications such as Work, Community, Shop, Culture and Contemplation can be experienced on the stand in one-to-one spatial displays.

Simply drop by at our stand in Hall 3.0!
See a diversity of product innovations, gain insights into new technologies – and discover the "ERCO individual" services for individual customer products. We look forward to seeing you!

Light+Building

The world's leading fair
for light and building technology
18. - 23.03.2018
Frankfurt am Main
