Palau Robert, Barcelona

Report

The architectural designs appear to be bathed in bright light thanks to backlit, translucent display walls and supplementary highlights.

"RCR Arquitectes - Creativitat Compartida" presented designs from the Catalan architects Rafael Aranda, Carme Pigem and Ramon Vilalta.

feature Spherolit lenses which create various light distributions and the luminaires can be replaced without tools. To enable a variety of display options, ERCO offers six highly precise, in-house developed lenses ranging from narrow spot to flood and oval flood.

**Announcement on our own behalf:**

From 23 September to 9 October 2016 the exhibition "Matthew Penn - Illuminating Characters" in cooperation with ERCO can be seen in the Palau Robert. The British artist illuminates his paintings exclusively with ERCO lighting tools and light control is a central element of design in his art. For more information, see the report "[Matthew Penn's Sense of Light](#)"
