

Architect: Schneider & Schumacher, Frankfurt
Lighting designer: Schneider & Schumacher, Frankfurt
Photographer: Thomas Pflaum, Castrop Rauxel
Project location: Rheinau-Freistett

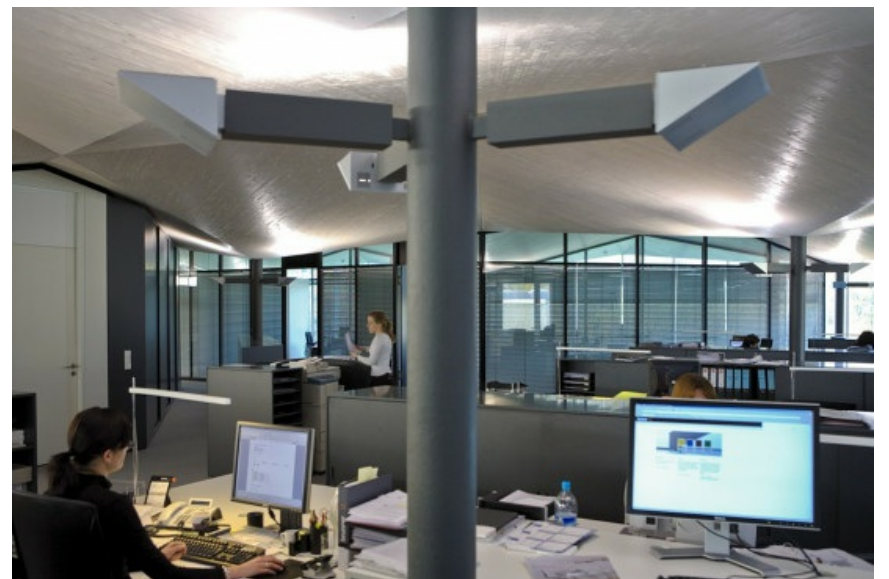

Brunner Communication Centre

The new premises of the furniture manufacturer captivate with a unique ceiling design and a triangular layout of the showroom and office building.

Based in Rheinau in Baden, the furniture manufacturer for public and commercial buildings has established itself over the last few years as a market leader in the rapidly expanding market for functional furniture geared to the elderly.

As one of the fields of activity, the company provides airport furniture and recently also received an order from Messe Frankfurt for 3000 chairs. Brunner sets great store by the fact that all its furniture, such as tables and chairs, are exclusively produced in Germany.

On the ground floor, Optec spotlights with low-voltage halogen lamps effectively illuminate the display area, while the walls are uniformly illuminated by Optec wallwashers and make for an appropriate background. The offices on the second floor are bathed in soft indirect light provided by Trion uplights with metal halide lamps.
