Project location: Bonn

Ibis Hotel Bonn

The Accor Group is currently re-launching its economy hotel brand Ibis, equipped with a new design concept that includes LED wallwashers and directional luminaires for comfortable yet efficient lighting.

Attractive lighting is one of this hotel brand's trademarks. The modular range of Quintessence recessed luminaires is by now tried and tested; hence it is the solution of choice for various hotels. In addition, LED directional luminaires accentuate areas and objects in the room to attract looks and give brilliance to certain objects.
