Winecenter winery Kaltern

The architecture of the facilities on the South Tyrolean wine route is defined by a dialogue between the old main building and new salesrooms illuminated by ERCO.

The famous wine-growing region along Lake Kaltern gave itself a contemporary image with modern architecture: the new Winecenter incorporates sophisticated premises for wine selling and tasting - presented in the light of Optec spotlights, Quadra recessed directional luminaires and Lightcast wallwashers and floor washlights.
