

Gugging Museum, Maria Gugging

Photographer: Gustavo Allidi Bernasconi
Project location: Maria Gugging

Few other museums stand for 'art brut' - the autodidactic art of lay people, children and individuals with mental disabilities - like the museum in the Austrian town of Maria Gugging. Special focus in the work here is given to communicating it to pupils, students and adults. As a result, the museum's lighting concept comprises Logotec with narrow spot characteristic for maximum contrast through accentuation.
