

Salt Mine Museum

Architect: Akademia Sztuk Pięknych Kraków, Prof. Maciej Radnicki
Photographer: Thomas Pflaum, Castrop-Rauxel
Project location: Wieliczka

The Wieliczka salt mine is one of the oldest salt mines in the world. With underground mining carrying on since the 13th century, the mine has now become a Unesco world heritage site. The grazing light of Focalflood LED facade luminaires impressively bring out the stone textures in the exhibition rooms.
