Färdig Betong Konferenscenter

It was the objective of Swedish concrete supplier AB Färdig Betong to present concrete with an emphasis on creativity and to create a place for staff training.

In a rural setting in Southern Sweden, concrete supplier AB Färdig Betong has created a conference centre with overnight accommodation that demonstrates the creative potential of this material. The differentiated illumination of meeting rooms, the restaurant and guest rooms is accomplished using ERCO lighting tools and the DALI Light System.
