Ibis Hotel Frankfurt

The Accor Group is currently re-launching its economy hotel brand Ibis, equipped with a new design concept that includes LED wallwashers and directional luminaires for comfortable yet efficient lighting.

A consistent interior design is an integral part of this hotel brand's corporate design. Lighting is an important aspect of this concept. The modular Quintessence range both meets the requirements of vertical illuminance and accentuates certain features of the room. LED technology ensures it is done efficiently.
