Project location: Coburg

Brose Fahrzeugteile GmbH & Co. KG

For the renovation of its company building dating back over one hundred years, the automobile supplier opted for ERCO products: TM spotlights and Optec luminaires illuminate the conference rooms, while Tesis recessed floor luminaires light up the facades.

Parabelle pendant luminaires with metal halide lamps ensure safe, efficient and glare-free light for the workplaces and pathways in the workshops.

The administrative building combines product exhibitions with conference zones. Quinta spotlights accentuate the exhibits, while Optec luminaires mounted on suspended Hi-trac tracks above the conference tables provide comfortable working light.
